**Best practices** — These items highlight common accessibility best practices.

▲

[id] attributes on the page are not unique

▼

**Internationalization and localization** — These are opportunities to improve the interpretation of your content by users in different locales.

▲

<html> element does not have a valid value for its [lang] attribute.

▼

**Names and labels** — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

▲

Image elements do not have [alt] attributes

▼

▲

Links do not have a discernible name

▼

**Navigation** — These are opportunities to improve keyboard navigation in your application.

▲

Some elements have a [tabindex] value greater than 0

▼

**Additional items to manually check (11)** — These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).

Passed audits (15)
